The vendor shall have the ability and the equipment to complete all work within the specified time.

The vendor shall base the cost for this scope of work on a lump sum price per road/project as established in Section 4, Pricing/Certifications/Signatures, Pricing Section. This price shall be all inclusive to include all items, such as but not limited to, Maintenance of Traffic (MOT), equipment, materials and labor to satisfactorily complete the work in accordance with contract specifications. No change orders, modification of quantities, or addition of line items will be provided after acceptance is provided for the performance of work under the original scope.

This schedule shall show the date that the work is to be started and tentative completion dates. The vendor shall maintain coordination with the Project Manager at all times.

The vendor shall be fully responsible for maintaining in good condition all items that are not being removed, such as but not limited to, existing trees, turf and shrubs situated within the designated right of way and on private property adjacent to work areas.

The use of climbing irons, spurs and spikes shall not be allowed for this operation.

TECHNICAL REQUIREMENTS

1. Pruning/Trimming Standards

All work shall be in accordance with the International Arborist Association (ISA) Pruning Standards. The tree pruning shall only be done by employees trained and skilled in this class of work. Work shall be done in accordance with recognized and approved principles of modern arboriculture methods with emphasis on tree health and symmetry. The trim contour will be held continuous throughout the work limits to give a uniform appearance.

All overhead clearance trimming for roadways shall be a minimum of eighteen (18) feet above the roadway. This shall be measured from the highest point of the pavement.

Side clearance trimming for roadways shall be a minimum of ten (10) feet from the edge of pavement, unless otherwise specified in the Scope of Services or as authorized by the Project Manager.

Overhead clearance trimming for sidewalks shall be nine (9) feet above the highest point of the sidewalk. There shall be an even taper to join the differences in trimming heights when they are sidewalks in conjunction with roadway trimming. The overhead clearance shall be for a minimum of four (4) feet behind the sidewalk to ten (10) feet from the edge of the roadway.

Side clearance trimming for sidewalks shall be four (4) feet from the back edge of the sidewalk.

All cuts shall be made just outside the branch collar whenever possible. The vendor shall avoid leaving long stubs even if this means going beyond the clearance trimming measurements.

All cuts shall be in a manner that will prevent free, rapid, and uncontrolled descent of the portion of the tree being removed.

If a large limb is to be removed, its weight shall first be reduced. This shall be done by making an undercut about twelve (12) to eighteen (18) inches from the limb's point of attachment. A second cut to remove the limb shall be completed at the top of the limb directly above or a few inches farther out from the undercut. The stub shall be removed after the weight of the limb has been eliminated. Any damage caused to a tree by the vendor shall be repaired at no cost and to the satisfaction of the Project Manager. If the tree dies due to the actions of the vendor, the vendor shall be required to promptly remove the dead tree at no cost to the County and replace the tree with one of equal diameter and growth, or to compensate the County for the loss of the tree in an amount determined by the County to be fair market value of the damaged tree.

A pruning cut that reduces the length of a branch or parent stem should bisect the angle between its branch bark ridge and an imaginary line perpendicular to the branch or stem.

2. Palm Pruning

Palm tree trimming shall be done in such a way that all palm fronds that are bending below a line parallel with the ground shall be removed from the tree. Any dead fronds shall be removed, whether or not they are below the line parallel to the ground. Any fronds that can be considered a sight distance problem shall be removed regardless of their height from the pavement or their alignment to the parallel line. Removal of the fronds shall be done in such a way as to not damage the tree. The cut shall be smooth and void of any signs of tearing or breaking.

Palm fronds removed shall be severed close to the petiole base without damaging living trunk tissue.

3. Brush Clearing

All underbrush, including but not limited to low growing shrubs, bushes, wild grasses, vines and weeds shall be removed within the determined work area. All immature trees less than six (6) inches in diameter shall be completely removed.

4. Site/Debris Cleanup

All debris that is created as part of this work becomes the property of the vendor and the vendor shall ensure that it is disposed of properly.

If the vendor chooses to utilize a chipper, it shall be done in such a way that the chips will be hauled off. At no time shall the vendor be allowed to leave any wood chips onsite.

The vendor shall rake and remove all branches that are greater than 1/4" in diameter. All other debris shall be blown or swept off the roadway to the side of the road in rural areas and shall be picked up in residential areas. No debris shall remain after the work has been completed.

All equipment used by the vendor is subject to inspection by the Project Manager. - C. Any spillage of hazardous chemicals and/or wastes caused by the vendor must be reported immediately to the proper authority and the Project Manager. All spills shall be cleaned up in accordance with all local, State, and Federal regulations. The cost of cleanup of any spillage of hazardous chemicals caused by the vendor shall be the sole responsibility of the vendor and the County will share no responsibility for these costs. A copy of the completed compliance order with local, State, and Federal agencies shall be given to the County.
- D. If any hazardous chemicals or conditions are discovered by the vendor during the normal work operation, it is the responsibility of the vendor to immediately contact the Project Manager with a description and the location of the condition.
- E. The Project Manager or other County representatives may periodically monitor the work for safety. Should there be safety and/or health violations, the County's representative may have the duty to require the vendor to correct the violation in an expeditious method. If there is any situation that is deemed unsafe by the Project Manager or other County representatives, the project

will be shut down immediately upon notice and will not resume work until the unsafe condition has been remedied.

- F. Should the work site be in a hazardous area, the County shall take reasonable actions to furnish the vendor with information concerning hazards such as the types of the identification of known toxic material, machine hazards, Material Safety Data Sheets, or any other information that would assist the vendor in the planning of a safe work site. - H. The vendor shall designate a competent person of its organization whose duty shall be the prevention of accidents. This person shall be literate and able to communicate fully in the English language because of the necessity to read job instructions and signs, as well as the need for conversing with management personnel. This person shall be the Vendor's Superintendent unless otherwise designated in writing to the Project Manager. All communications to the Superintendent shall be binding as if given to the vendor.

5. GENERAL INSPECTION REQUIREMENTS

- A. Due to the nature of this Agreement, The County shall at the time of establishment of need, require the vendor to become fully informed as to the nature and extent of the work required and its relation to any other work in the area, including possible interference from other site activities. Arrangement for vendor's inspection of facilities or sites and/or activity schedules may be secured from the user department. Failure to visually inspect the facilities or sites may be cause for disqualification of vendor on that individual project.
- B. Vendor shall furnish the Project Manager with every reasonable facility for ascertaining whether the work performed and/or materials used are in accordance with the requirements and intent of the specifications. If the Project Manager so requests, the vendor shall, at any time before final acceptance of the work, remove or uncover such portions of the finished work as may be directed. After examination, the vendor shall restore the uncovered portions of the work to the standard required by the specifications. Should the work exposed or examined prove unacceptable in the opinion of the Project Manager, the uncovering or removal, and the replacing of the covering or making good of the items removed, shall be at the vendor's expense. However, should the work exposed or examined prove acceptable in the opinion of the Project Manager, the uncovering or removing and the replacing or the covering or making good of the items removed, shall be paid for by the County.
- C. If during or prior to the operations, the Project Manager should fail to reject defective work or materials, whether from lack of discovery of such defect, or for any other reason, such initial failure to reject shall in no way prevent the Project Manager's later rejection when such defect is discovered, nor obligate the County to final acceptance or payment, and the vendor shall make no claim for losses suffered due to any necessary removals or repairs of such defects.
- D. If during or prior to the operations, the Project Manager, rejects any portion of the work on the grounds that the work or materials are defective, the Project Manager will give the vendor notice

of the defect. The vendor shall then have seven (7) calendar days from the date the notice is received to correct the defective condition. If the defect has not been corrected within seven (7) calendar days, the Project Manager will send a second written notice to the vendor giving the vendor another seven (7) calendar days to correct the defect. If the vendor fails to correct the deficiency within the second seven (7) calendar days after receipt of the notice, the County may take whatever action is necessary, including correcting the deficient work utilizing another vendor or terminating the contract.

- E. Should the vendor fail or refuse to remove and renew any defective material used or work performed, or to make any necessary corrections in an acceptable manner and in accordance with the requirements of the specifications, within the time indicated in writing, the County, will have the authority to cause the unacceptable or defective materials or work to be repaired, removed and replaced, as may be necessary, at the vendor's expense. Any expense incurred by the County, whether direct, indirect or consequential, in making the repairs, removals, or replacements, which the vendor has failed or refused to make, shall be paid for out of any monies due or which may become due the vendor, or may be charged against the contract bond, if any. A Change Order will be issued, incorporating the necessary revisions to the contract documents, including an appropriate decrease to the contract amount. Such direct, indirect and consequential costs shall include, such as, but not be limited to: costs of repair and replacement of work of others destroyed or damaged by correction, removal or replacement of work of the vendor's defective work and additional compensation due the County. The vendor shall not be allowed an extension of the contract time because of any delay in performance of the work attributable to the exercise by the County of the County's rights and remedies hereunder.
- F. When the United States Government or the State of Florida is to pay a portion of the cost of the project, the work will be subject to such inspection by Federal or State representatives as deemed necessary, but such inspections will in no case make the United States Government or the State of Florida a party to this contract.
- G. All work performed and all materials furnished shall be in reasonably close conformity with the tolerances indication in the specifications. In the event the Project Manager finds the materials or finished product in which the materials are used and not within reasonably close conformity to the specifications, the Project Manager will then make a determination if the work shall be accepted and remain in place. In this event, the Project Manager will document the basis of acceptance by a Change Order which will provide for an appropriate deduction as needed in the contract price for such work or materials as the Project Manager deems necessary to conform to the determination based on the Project Manager's professional judgment.

6. PROJECT MANAGER

It is agreed to by the parties that the Project Manager will decide all questions, difficulties, or disputes, of whatever nature, which may arise relative to the interpretation of the plans, construction, prosecution and fulfillment of the scope of services and as to the character, quality, amount and value of any work done, and materials furnished, under or by reason of this Agreement. The Project Manager may appoint representatives as desired that will be authorized to inspect all work done and all materials furnished.

coordinate the work being done on the project by its subcontractors and material suppliers, as well as coordinate the vendor's work with the work of other contractors so that the vendor's work or the work of others shall not be delayed or impaired by any act or omission of any act by the vendor. The vendor shall be solely responsible for all means, methods, techniques, sequences and procedures, as well as coordination of all portions of the work under the contract documents.

- B. Should the vendor be obstructed or delayed in the prosecution of or completion of the work as a result of unforeseeable causes beyond the control of the vendor, and not due to the vendor's fault or neglect, the vendor shall notify the Project Manager by telephone as soon as possible and in writing within two (2) business days after the commencement of such delay, stating the cause or causes thereof, or be deemed to have waived any right which the vendor may have had to request a time extension.
- C. If the vendor complies with the two (2) business days notice requirement, the Project Manager will ascertain the fact and the extent of the delay being claimed and recommend an extension to the contract time when, in the Project Manager's sole judgment, the findings of fact justify such an extension. The vendor shall cooperate with the Project Manager's investigation of the delay by providing any schedules, correspondence or other data that may be required to complete the findings of fact. Extensions to the contract time may be granted for only those delays which impact the vendor's schedule. Extensions of contract time, if approved by the Project Manager, must be authorized in writing.
- D. Weather events are specifically excluded as an excused cause for delay under this agreement and no additional days shall be given for rain days.
- E. The County and the vendor recognize that, since time is of the essence for this agreement, the County will suffer financial loss if the work is not completed within the time specified. The County will be entitled to assess, as Liquidated Damages, but not as a penalty, for each calendar day that the project continues after the scheduled completion date. The project shall be deemed to be completed on the date the work is considered complete to the satisfaction of the County. The vendor hereby expressly waives and relinquishes any right which it may have to seek to characterize the Liquidated Damages as a penalty. The parties agree that the Liquidated Damages sum represents a fair and reasonable estimate of the County's actual damages at the time of contracting if the vendor fails to complete the work in a timely manner. The Liquidated Damages shall be as follows:

If at any time, the Project Manager determines that any equipment is deficient in any way, the vendor shall remove the equipment from service immediately, and the equipment shall remain out of service until the deficiency is corrected to the satisfaction of the Project Manager. Inspection and approval of the vendor's equipment by the Project Manager shall not relieve the vendor of the responsibility or liability for injury to persons or damage to property caused by the operation of the vendor's equipment, nor shall it relieve the vendor of the responsibility to meet the established time for the completion of the service.
- B. All safety devices installed by the manufacturer shall be in place and in proper working order at all times. At a minimum, all equipment used within the right of way shall be equipped with a slow moving vehicle sign, and properly operating amber flashing or white strobe light.
- C. The equipment used must be in good repair and operating condition at all times. This service requires that all equipment shall be environmentally safe, with no oil leaks, blowing fuel, or leaking hydraulic lines.

16. SANITATION

The vendor shall provide and maintain adequate sanitary conveniences for the use of persons employed for this project. These conveniences shall be maintained at all times without nuisance, and their use shall be strictly enforced. The location of these conveniences shall be subject to the Project Manager's approval.

17. OTHER WORK

- A. The vendor will cooperate with County personnel or anyone who may be engaged in authorized work prior to final completion of the project.
- B. The vendor shall cooperate with the owners of any underground or overhead utility lines in their removal and rearrangement operations in order that these operations may progress in a reasonable manner and that service rendered by these parties will not be interrupted.
- C. The County may perform other work related to the project site or, in the general vicinity of the site by the County's own forces, have other work performed by utility owners or other direct contracts. If other work is not identified in the contract documents and if the vendor believes that such performance will involve additional expenses to the vendor or require additional time, the vendor shall send written notice of that fact to the County and the Project Manager within two (2) business days of being notified of the other work. If the vendor fails to send the above required notice, the vendor will be deemed to have waived any rights it otherwise may have had to seek an extension to the contract time or adjustment to the contract amount. The vendor shall afford each utility owner and other contractors (or the County, if the County is performing additional work with the County's employees) proper and safe access to the site and a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such work and shall properly connect and coordinate its work with theirs. The vendor shall not endanger any work of others by cutting, excavating, or otherwise altering their work and will only cut or alter their work with the written consent of the Project Manager and the others whose work will be affected.
- D. If any part of the vendor's work depends, for proper execution or results, upon the work of any other contractor other than a subcontractor or utility owner, the vendor shall inspect and promptly report to the Project Manager, in writing two (2) business days, any delays, defect or other problems in such other work that renders it impossible for the vendor to obtain proper execution or results. The vendor's failure to report will constitute an acceptance of the other work as fit and property for integration with the vendor's work.

18. BONDS

Not applicable to this solicitation.

19. FINAL INSPECTION

- A. Maintenance of Work. The vendor shall maintain all work in as-new condition until the final inspection is completed and the work accepted by the Project Manager.
- B. Upon notice from the vendor that the service has been completed, the Project Manager will make a final inspection within five (5) business days of receipt of notification. The Project Manager will notify the vendor if necessary of any deficiencies with the project. The vendor shall correct all deficiencies before final acceptance and payment is made. If the deficiencies have not been completed within the contracted time, the Project Manager may send out a notification notifying vendor of assessment of Liquidated Damages that can be applied for any day over the time allowed per the contract.
- C. The vendor shall notify the Project Manager when the deficiencies have been completed and corrected. If the deficiencies are not corrected when inspected, the vendor shall be notified again in writing about any deficiencies. Once the repairs have been corrected by the vendor, the Project Manager shall make another inspection. There shall be an eighty dollar (\$80.00) inspection fee assessed to the vendor for this inspection and any re-inspection that may be required after that. The fee is assessed to offset the additional costs associated with County labor and vehicle usage.

required for unnecessary inspections. The fee(s) shall be deducted from the final invoice for that release order.

20. FINAL ACCEPTANCE

- A. The contract will be considered complete when all work has been completed and has been accepted by the County and the Project Manager. The vendor will then be released from further obligation except as set forth in the warranty and/or bonds in this Contract.
- B. The County reserves the right, should an error be discovered in the partial or final estimates, or should proof of defective work or materials used by or on the part of the vendor be discovered after the final payment has been made, to claim and recover from the vendor or its surety, or both, by process of law, such sums as may be sufficient to correct the error or make good the defects in the work and materials, including any fees or costs associated with the additional services of the Project Manager.

21. MEASUREMENT AND PAYMENT

- A. All work completed under the terms of this contract shall be paid as a unit price payment at the cost as established in Section 4, Pricing/Certifications/Signatures, Pricing Section and as discussed in Section 2, Scope of Services.
- B. The vendor shall accept compensation provided under the terms of this contract as full payment for furnishing all materials and for performing all work contemplated and embraced under this contract. Such compensation shall also be for any and all loss or damage arising out of the nature of the work or from the action of the elements, or from any unforeseen difficulties or obstructions encountered during the contract period until final acceptance by the County.

22. WARRANTY

- A. The vendor shall obtain and assign to the County all express warranties given to the Vendor or any subcontractors by any material suppliers, equipment or fixtures to be incorporated into the Project. The Vendor warrants to the County that any materials and equipment furnished under the Contract Documents shall be new unless otherwise specified, and that all work shall be of good quality, free from all defects and in conformance with the Contract Documents. The Vendor further warrants to the County that all materials and equipment furnished under the Contract Documents shall be applied, installed, connected, erected, used, cleaned and conditioned in accordance with the instructions of the applicable manufacturers, fabricators, suppliers or processors except as otherwise provided for in the Contract Documents. Unless otherwise specified, if within eighteen (18) months after final completion and acceptance, any work is found to be defective or not in conformance with the Contract Documents, the Vendor shall correct it promptly after receipt of written notice from the County. The Vendor shall also be responsible for and pay for replacement or repair of adjacent materials or work which may be damaged as a result of such replacement or repair. These warranties are in addition to those implied warranties to which the County is entitled as a matter of law.
- B. The sod shall be warranted to be free of noxious and invasive weeds, disease, and insects. If pests and/or noxious weeds manifest themselves within sixty (60) days of placement of the sod, the vendor shall treat the affected areas. The process for treating these areas shall be approved by the Project Manager. If the sod does not meet any of the specifications within this document, the vendor shall be responsible to replace it at no expense to the County. It shall be the responsibility of the vendor to insure that the sod is sufficiently established as previously described within these

specifications. If the sod dies or does not become established the vendor shall be responsible for the replacement at no cost to the County.
